## Fungicidal Wash

### Product Description

#### Field of Application:

Permarock Fungicidal Wash (Moss & Mould Remover) is a powerful, fast-acting ready mixed biocide solution that is effective at removing lichens, fungus, mould, algae and moss from most surfaces.

- Kills mould and fungal growth caused by dampness on internal and external walls
- Leaves a residual surface to help prevent further infestation
- Removes algae, lichen, green slime and fungal growth from patios / drives.

#### Benefits:

- Internal and external use
- Fast-acting
- Leaves a residual surface to prevent future infestation
- Powerful formulae
- Registered with HSE under "Control of Pesticides Regulations; 1986" (HSE 10400).

#### Limitations:

- Ready to use - do not dilute
- For use only as specified as a surface biocide

#### Packaging:

1 litre (pack of 12)  
5 Litres (pack of 4)

#### Storage:

Store containers at moderate temperatures in original containers. Protect from extremes of temperatures, frost and direct sunlight.

#### Shelf Life:

24 months from the date of manufacture when stored according to manufacturer's Instructions.

#### Technical Data:

Appearance	Clear colourless / slightly yellow liquid
Specific gravity @ 20°C	1 g/cm <sub>3</sub>
Freezing point	approx. 0°C
Active ingredients	Alkyl (C12-16) Dimethylbenzyl ammonium chloride (0.99% w/w) 2-Phenylphenol. (0.25% w/w)
Drying time	1-12 hours from washdown, depending on the surface
Coverage	5 - 10 m <sup>2</sup> / litre depending on the absorbency of the surface

## Application

### General:

Before using the product, the user should carry out any necessary tests to ensure that the product is suitable for the intended application. Moreover, all users should contact the seller or the manufacturer of the product for additional technical information concerning its use if they think that the information in their possession needs to be clarified in any way, whether for normal use or a specific application of our product.

### Preparation of Substrates:

Brush surfaces to remove debris and heavy growths of moss, lichens, etc.

Apply by brush or spray in at a rate of 1 litre per 5 - 10m<sup>2</sup> depending on porosity of surface. Leave the solution for 20 minutes. Finally, wash down the area with water. Repeat process for badly infested areas. Take care not to allow residues to run directly into fresh watercourses.

### Preparation of Material:

Ready to use: Do not dilute

### Method of Application:

Always read the label before use and wear suitable protective equipment.

Apply by brush or low pressure, non-atomising spray at a rate of 5 - 10 m<sup>2</sup> / litre, depending on the porosity of the surface.

Leave the solution for 20 minutes, then wash down with water.

Repeat the process for heavily infested areas.

### Working Temperature:

Minimum temperature for application and drying: + 5°C for product, substrate and air.

### Cleaning of Tools & Equipment:

Clean tools with water immediately after use.

## Advice

### Waste removal:

Waste material and related packaging must be disposed of in a safe way in accordance as site waste and in accordance with the with the full requirements of the Local Authorities.

### Health & Safety:

Consult MSDS for full list of hazards

Keep out of reach of children

Do not empty into watercourses

Wear suitable protective clothing / equipment
